Course content

Why Attend

Another evolution is here and talk has begun about Industry 5.0. With urgent need to adopt digital transformation, global spending on digital transformation is expected to reach \$2.8 trillion in 2025, as per the International Data Corporation (IDC).

In the past, many organizations have managed to evolve and survive by going through a fundamental change of service delivery transformation like Britannica, the now, digital encyclopedia. Others have managed to benefit from innovative platforms and digital communities to evolve and become disruptors like Airbnb, Uber, and Netflix.

Course Methodology

- This course is based on open discussions, question and answer sessions, group exercises, activities, videos, case studies and presentations based on best practices, case studies and core principles.

Course Objectives

- Explain the journey and process of digital transformation from digitization, digitalization through to transformation
- Utilize emerging technologies, such as Big Data, Blockchain, Cloud Computing, Robotic Process Automation (RPA), and Metaverse, and list their applications and business cases
- Understand the principles for developing and implementing a digital business strategy
- Explain important trends evolving from digital transformation and the criticality of investing and implementing them
- Play an active role in defining the leadership and governance structure for digital transformation initiatives and translate digital strategy into action
