Course content

Why Attend

Demand for digital solutions is far greater than most IT departments can deliver. Business teams wait months for simple applications, workflows and reports, or create risky workarounds in spreadsheets and email.

Low-code and no-code platforms allow business users and IT teams to build applications, workflows, forms, dashboards and automations visually, with little or no traditional programming, dramatically reducing delivery time and cost.

Course Methodology

• This training course will utilise a variety of proven adult learning techniques to ensure maximum understanding, comprehension and retention of the information presented. This includes an interactive mixture of lecture-led learning, case studies, practical exercises and group discussions.

Course Objectives

• Understand core principles and best practices covered in Low-Code and No-Code Platforms for Business Innovation.

• Apply practical techniques to day-to-day operational challenges.

• Build an implementation action plan suitable for your organization.

Target Audience

• Business process owners and analysts

• Digital transformation and innovation teams

• IT managers and solution architects

• Operations and administrative professionals
