Course content

Why Attend

Many organisations have seen agile teams succeed, only to find that the benefits stall when dozens of teams, departments and suppliers must work together on large products, programmes and transformations.

Scaling agile requires more than adding teams. It demands new structures, coordinated planning, portfolio management, agile governance and leadership behaviours that support autonomy while keeping alignment with strategy.

Course Methodology

• This training course will utilise a variety of proven adult learning techniques to ensure maximum understanding, comprehension and retention of the information presented. This includes an interactive mixture of lecture-led learning, case studies, practical exercises and group discussions.

Course Objectives

• Understand core principles and best practices covered in Scaling Agile Across the Enterprise.

• Apply practical techniques to day-to-day operational challenges.

• Build an implementation action plan suitable for your organization.

Target Audience

• Transformation and change leaders

• Programme and portfolio managers

• Agile coaches and release train engineers

• PMO leaders
