Course content

Why Attend

The banking industry is undergoing significant transformation driven by digital innovation, evolving customer expectations, regulatory developments, competitive pressure, and changing economic conditions. Traditional banking business models are increasingly challenged by fintech companies, digital-first financial institutions, embedded finance solutions, and new approaches to delivering financial services.

To remain competitive and resilient, banks must develop strategies that balance profitability, customer value, operational efficiency, technological innovation, risk management, and regulatory compliance. However, creating a compelling strategic vision is only the beginning. Successful transformation requires clear priorities, effective governance, coordinated execution, appropriate investment decisions, and measurable performance outcomes.

Course Methodology

- The programme combines instructor-led strategic discussions, banking industry case studies, competitive analysis exercises, operating model assessments, transformation planning workshops, and executive decision-making simulations.
- Participants work with realistic banking scenarios involving market competition, digital channel development, customer experience, operational efficiency, regulatory constraints, and technology investment decisions.
- Practical activities focus on defining strategic objectives, evaluating transformation opportunities, prioritising initiatives, developing governance structures, managing implementation risks, and establishing performance measurement frameworks.

Course Objectives

- Analyse the strategic forces reshaping the banking industry
- Evaluate banking business models, competitive positioning, and growth opportunities
- Develop a clear strategic vision aligned with organisational capabilities and market conditions
- Translate banking strategy into measurable objectives and implementation priorities
- Assess digital banking transformation and technology investment opportunities
- Design target operating models that support strategic objectives

Course content

Target Audience

- This course is suitable for:
- Banking chief executives and senior executives
- Banking strategy and corporate planning managers
- Digital banking and transformation directors

Course outline

Detailed course outline

Day-by-day outline for Bank Strategy and Transformation: From Vision to Execution.

Day 1 - Banking Industry Transformation and Strategic Positioning

- 09:00-09:39 | Analysing banking industry developments involving digital competition, customer expectations, regulatory change, economic uncertainty, and financial technology innovation
- 09:39-10:18 | Evaluating traditional, digital-first, and platform-based banking business models and their implications for profitability and customer value
- 10:18-10:57 | Applying strategic analysis techniques, including SWOT, PESTLE, competitor assessment, and banking market segmentation
- 10:57-11:00 | Identifying growth opportunities involving retail banking, corporate banking, payments, lending, digital services, and customer relationship development
- 11:00-11:30 | Coffee break
- 11:30-12:05 | Identifying growth opportunities involving retail banking, corporate banking, payments, lending, digital services, and customer relationship development (continued)
- 12:05-12:43 | Defining strategic vision, mission, competitive differentiation, and long-term organisational priorities
- 12:43-14:00 | Practical workshop: Conducting a banking strategic position assessment and developing a proposed strategic vision with clearly defined business priorities
