Course content

Why Attend

Organizations need flexible and efficient processes that support strategy, innovation, and rapid response to change. Traditional work designs often create delays, silos, and limited accountability. Modern process design focuses on agility, problem-solving, and people-centered execution. This course provides participants with practical tools to redesign business processes, solve operational problems systematically, and build visual systems that improve performance.

Course Methodology

- This course uses an interactive and practical approach through presentations, case studies, workshops, group discussions, practical modelling exercises, problem-solving activities, and real workplace examples.

Course Objectives

- Understand modern principles of strategic process design
- Apply dynamic work design methods in agile environments
- Develop clear problem statements for improvement initiatives
- Use structured problem-solving techniques effectively
- Design human-centered workflows and operating models
- Apply visual management tools to improve execution

Target Audience

- Operations Managers
- Business Analysts
- Process Improvement Professionals
- Strategy Managers

Course outline

Detailed course outline

Day-by-day outline for Business Process Design for Strategic Management.
