Course content

Why Attend

Massive advances in technology combined with political uncertainty and associated market volatility mean that today's work environment is required to embrace change. If you, your team or your organization is resistant to new demands, processes or opportunities, you may lose competitive advantage. So how do we identify the need for change and respond effectively without throwing our work and the work of our teams into chaos?

As the Digital Transformation age gathers pace, some organizations have embraced a new management thinking and are enjoying a sustained competitive advantage, faster speed to market, increased customer satisfaction and superior profits.

Course Methodology

Course Objectives

Target Audience

- This Certificate in Agile Leadership training course is targeted at both management and employees. The course is designed to clearly explain formal management approaches and enable delegates to recognize "warning signals" that indicate when work such as various projects are about to encounter issues.
- Traditionally, work is organized around logical operating procedures and plan-based projects.
- Delegates engaged in such work explore other mechanisms to support emergence of work and evolution of work procedures to reflect their own work situation.
- Directors and senior decision-makers
