Course content

Why Attend

Big Data has become a strategic asset that helps organizations improve decision-making, enhance customer experience, reduce costs, and identify new growth opportunities. Managers do not need to be data scientists, but they must understand how data creates value, supports strategy, and drives competitive advantage. This course provides participants with practical knowledge of Big Data concepts, business applications, analytics processes, and leadership approaches for data-driven organizations.

Course Methodology

- This course uses an interactive and practical approach through presentations, business case studies, group discussions, dashboards, strategy workshops, and real organizational examples.

Course Objectives

- Understand Big Data concepts and business relevance
- Learn the data analytics lifecycle from discovery to action
- Identify opportunities for data-driven decision-making
- Understand structured and unstructured data sources
- Explore cloud and digital platforms supporting Big Data
- Apply Big Data use cases across industries

Target Audience

- Managers and Executives
- Department Heads
- Business Leaders
- Strategy Professionals
