Course content

Why Attend

Finance and accounting knowledge is essential for making sound business decisions, controlling performance, and supporting sustainable growth. Professionals across all functions need to understand financial statements, budgeting, costs, financing options, and investment evaluation. This course provides participants with practical finance and accounting tools that can be applied immediately in the workplace.

Course Methodology

- This course uses an interactive and practical approach through presentations, case studies, financial exercises, group discussions, ratio analysis, budgeting workshops, and real workplace examples.

Course Objectives

- Understand core accounting principles and financial systems
- Read and interpret financial statements confidently
- Apply management accounting tools for decisions
- Prepare budgets and analyze performance variances
- Evaluate financing options and financial risks
- Use investment appraisal techniques effectively

Target Audience

- Finance and Accounting Staff
- Non-Finance Managers
- Business Owners
- Department Managers
