Address

Waarderweg 50, 2031PB Haarlem - Netherlands.

Course content

Why Attend

This course empowers participants to recognize, manage, and mitigate the risks associated with hazardous chemicals and waste in the workplace. By attending, you'll gain the knowledge and skills needed to comply with regulatory requirements, enhance workplace safety, and contribute to environmental sustainability. Participants will leave with practical tools and strategies to protect people and the planet from chemical hazards effectively.

Course Methodology

- Instructor-led discussions to explain key concepts.
- Case studies to analyze real-world scenarios.
- Group activities and simulations to practice hazard identification and risk management.
- Hands-on exercises to apply best practices in hazardous waste handling and disposal.
- Multimedia presentations to illustrate the impact of effective chemical safety and waste management.

Course Objectives

- Identify and classify hazardous chemicals and waste based on international standards.
- Understand the risks and health impacts associated with hazardous substances.
- Implement strategies for safe chemical handling, storage, and transportation.
- Develop and apply hazardous waste management plans.
- Navigate relevant regulations and compliance frameworks.
- Respond effectively to chemical spills and emergencies.

Target Audience

- This course is designed for professionals involved in:
 - Environmental health and safety (EHS)
 - Chemical and hazardous waste management
 - Facilities and operations management

Course outline

Detailed course outline

Day-by-day outline for Chemical Safety and Hazardous Waste Management: Protecting People and the Planet.

Day 1 - Introduction to Chemical Safety

- Overview of chemical safety and hazardous waste management
- Common chemical hazards and their effects
- Regulatory frameworks (e.g., OSHA, EPA, REACH)
- Roles and responsibilities in chemical safety

Day 2 - Hazard Identification and Risk Assessment

- Classification of hazardous chemicals and wastes (GHS, SDS)
- Risk assessment tools and techniques
- Exposure limits and monitoring
- Labeling and signage requirements

Day 3 - Safe Handling and Storage of Chemicals

- Safe handling practices and personal protective equipment (PPE)
- Guidelines for chemical storage and segregation
- Transportation and shipping of hazardous materials
- Preventing and managing chemical spills

Course outline

Detailed course outline

Day-by-day outline for Chemical Safety and Hazardous Waste Management: Protecting People and the Planet.

Day 4 - Hazardous Waste Management

- Waste classification and categorization
- Collection, storage, and disposal of hazardous waste
- Recycling and reuse opportunities
- Developing a hazardous waste management plan

Day 5 - Emergency Response and Best Practices

- Spill response planning and implementation
- Emergency response procedures
- Case studies and lessons learned
- Integrating sustainability into chemical safety programs

Seminar dates

Available seminar dates

Live dates and pricing for Chemical Safety and Hazardous Waste Management: Protecting People and the Planet generated from the course details page.

Date	Location	Format	Fee
15 - 19 June 2026	Frankfurt	Classroom	€2,275
20 - 24 July 2026	Rome	Classroom	€2,975
3 - 7 August 2026	Kuala lumpur	Classroom	€1,575
7 - 11 September 2026	Barcelona	Classroom	€2,695
12 - 16 October 2026	London	Classroom	€2,940
9 - 13 November 2026	Munich	Classroom	€2,415
14 - 18 December 2026	Rome	Classroom	€2,975
