Course content

Why Attend

We are constantly faced with problems that require us to make decisions that are mostly reached without a complex decision-making process: are we hungry? We decide to eat. But some problems are more complex, such as prioritizing or determining why a process fails and what to do. These issues require a rational approach to resolving them. Sometimes, things get more complicated, or our decisions can significantly affect our lives, jobs, or those around us. Other times the problem is so unusual that it challenges rational and critical thinking; here lies the importance of objectively analyzing to formulate a decision, and here is when creative problem-solving and decision-making become invaluable tools.

This course covers the most important creative problem-solving and decision-making approaches. By understanding the mechanisms of thinking and providing the relevant methods and tools practiced during the sessions, participants will become more confident in solving problems and making decisions at work or in life, from simpler situations to more difficult or complex ones.

Course Methodology

- The course uses interactive techniques, such as brief presentations by the consultant and the participants, role plays (rehearsed and impromptu), Video clips with detailed debriefs, and individual and group feedback.

Course Objectives

- Build and expand decision making, critical thinking, and creative problem solving skills
- Apply rational approaches to solving problems and making decisions
- Utilize traditional and creative techniques for identifying causes and generating solutions
- Practice essential tools for proper decision making
- Employ creativity and lateral thinking as business tools

Target Audience

- Managers, supervisors, and administrators who will benefit from better problem-solving and decision-making, and business professionals who want to take their critical thinking to the next level by using their experience and intuition to make the right moves and decisions,
- Target Competencies
- Attention to details

- Decision making

Course outline

Detailed course outline

Module-by-module outline for Creative Problem Solving and Decision Making.
