Global Learning for Operational Leaders

Course content

Why Attend

Digital transformation is reshaping how governments deliver services, engage with citizens, and drive economic and social progress. This course equips public sector professionals with the skills and strategies to adopt and integrate technology into governance processes. Participants will learn how to overcome challenges, optimize operations, and create innovative, citizen-centric solutions through technology.

Course Methodology

• Expert-led lectures to explain digital transformation frameworks and trends.

• Case studies of successful digital transformation initiatives.

• Interactive workshops to design and refine digital strategies.

• Group exercises to solve real-world challenges collaboratively.

• Action planning to develop personalized digital transformation roadmaps.

Course Objectives

• Understand the role of digital transformation in improving governance and service delivery.

• Identify key technologies driving digital transformation in the public sector.

• Develop strategies for implementing digital initiatives effectively.

• Address challenges such as resistance to change, cybersecurity, and data management.

• Foster a culture of innovation within their organizations.

• Engage citizens through digital tools and enhance transparency and accountability.

Target Audience

• This course is ideal for:

• Government leaders and decision-makers.

• Public sector managers overseeing digital initiatives.

• IT professionals and digital transformation officers in government.
