Course content

Why Attend

Financial statements are essential for evaluating an organisation's financial position, operating performance, cash flows, and financial sustainability. However, reliable financial reporting depends not only on accurate accounting records but also on effective internal controls, sound financial governance, and systematic review procedures. Weak reconciliations, inappropriate accounting judgments, inadequate segregation of duties, and ineffective financial controls can result in material misstatements, financial losses, compliance failures, and unreliable management decisions.

The Financial Statement Review and Internal Controls course equips finance, accounting, audit, and compliance professionals with practical techniques for reviewing financial statements, assessing financial reporting risks, evaluating internal control effectiveness, and identifying potential errors, irregularities, and weaknesses in financial processes.

Course Methodology

- The programme combines instructor-led explanations, financial statement analysis exercises, internal control case studies, risk-control mapping workshops, transaction testing simulations, and practical financial review activities.
- Participants work with illustrative financial statements, general ledger extracts, reconciliation records, financial reporting scenarios, and internal control documentation. Exercises focus on identifying reporting risks, evaluating control effectiveness, investigating financial anomalies, documenting findings, and developing corrective action recommendations.

Course Objectives

- Interpret the principal components of financial statements and their relationships
- Apply analytical review techniques to identify unusual financial trends and potential misstatements
- Assess financial reporting risks associated with significant accounts, transactions, and disclosures
- Understand financial statement assertions and their relevance to review and control testing
- Evaluate the design and operating effectiveness of internal controls over financial reporting
- Assess controls over revenue, expenditure, payroll, inventory, and financial closing processes

Course content

Target Audience

- This course is suitable for:
- Financial accountants and senior accountants
- Financial controllers and finance managers
- Internal auditors and audit supervisors

Course outline

Detailed course outline

Day-by-day outline for Financial Statement Review and Internal Controls.

Day 1 - Financial Statement Interpretation and Financial Reporting Risk Assessment

- 09:00-09:39 | Understanding the structure and relationships of the statement of financial position, statement of profit or loss, statement of cash flows, and statement of changes in equity
- 09:39-10:18 | Examining financial reporting principles, materiality, accounting policies, estimates, and disclosures relevant to financial statement review
- 10:18-10:57 | Applying horizontal analysis, vertical analysis, and financial ratios to evaluate profitability, liquidity, solvency, and operating performance
- 10:57-11:00 | Identifying unusual movements, inconsistent account relationships, and potential indicators of financial misstatement
- 11:00-11:30 | Coffee break
- 11:30-12:05 | Identifying unusual movements, inconsistent account relationships, and potential indicators of financial misstatement (continued)
- 12:05-12:43 | Understanding financial statement assertions, including existence, completeness, accuracy, valuation, rights and obligations, and presentation
- 12:43-14:00 | Practical exercise: Reviewing a set of financial statements to identify significant reporting risks, unusual balances, and areas requiring further investigation
