Course content

Why Attend

Security projects such as installing access control, CCTV upgrades or perimeter protection involve technology, construction, stakeholders and operational continuity. Many fail to deliver expected security outcomes.

This Aractech course applies project management to security projects: requirements definition, design and specification, procurement, installation management, testing and commissioning, handover, training and post-implementation review. Participants plan a security project.

Course Methodology

- Project case studies
- Planning workshops
- Specification exercises
- Group discussions
- Reviews

Course Objectives

- Define security project requirements
- Develop specifications and designs
- Procure security systems and contractors
- Manage installation with minimal disruption
- Test, commission and hand over systems
- Review project outcomes

Target Audience

- Security managers

Course content

- Security project managers
- Facilities and engineering managers
- Security consultants
