Course content

Why Attend

Procurement is no longer a purely administrative function—it is a strategic driver of cost efficiency, risk reduction, and competitive advantage. Organizations depend on skilled procurement professionals to optimize supplier relationships, negotiate effectively, and ensure value across the supply chain. This course equips participants with advanced procurement strategies, sourcing techniques, and supplier management practices that align procurement with organizational goals. It is designed to transform procurement professionals into strategic decision-makers capable of delivering measurable business value.

Course Methodology

• This course blends strategic procurement theory with real-world business applications. Participants will engage in case studies, supplier negotiation simulations, and sourcing strategy workshops. Practical exercises will focus on spend analysis, supplier evaluation, contract negotiation, and procurement planning. Interactive discussions will highlight best practices from global procurement environments across industries such as construction, oil and gas, manufacturing, and services.

Course Objectives

- Understand strategic procurement principles and frameworks
- Develop effective sourcing and procurement strategies
- Conduct spend analysis and supplier segmentation
- Negotiate contracts and manage supplier relationships
- Apply total cost of ownership (TCO) concepts
- Improve procurement efficiency and value creation

Target Audience

- Procurement and Purchasing Managers
- Supply Chain and Logistics Professionals
- Project and Operations Managers
- Contract and Commercial Managers
